

# Port Alma

## WIND POWER PROJECT

### About the Proponent

The proponent of this project is the Kruger Energy Port Alma Limited Partnership (KEPA). KEPA is a partnership between Kruger Energy Group and a local partner.

Kruger is a private producer of paper, forest products, and energy. The company is based in Quebec. It is a 3rd generation family-owned business, employing over 10500 people. Kruger produces newsprint and lightweight coated paper, recycled linerboard and corrugated packaging, lumber and wood products, tissue (Scott Canada), and energy.

Kruger's other energy products include:

- 5 hydroelectric facilities that produce over 150 Megawatts (MW)
- 15 MW biomass plant (a 20 MW biomass plant in Quebec is currently under construction)
- Wind power projects are currently being developed in Ontario, Newfoundland, and Quebec
