

# Port Alma

## WIND POWER PROJECT

### Why is the project being built here?

- The Ontario Government wants to meet renewable energy targets and is encouraging the private sector to build and operate renewable energy facilities.
- Kruger Energy Port Alma Limited Partnership (KEPA) was selected by the Ontario Ministry of Energy as part of the Renewable Energy Request for Proposals (RFP) II to complete the Port Alma Wind Power Project
- The Port Alma study area has some of the strongest and most reliable winds in Southern Ontario.
- The project is close to major urban areas and Ontario's electricity grid.
